We apologize for any inconvenience caused. Updated 29/10/2020 It's hard to find a free VPN that works well on Android. I tested 43 free services on the Galaxy S10+, and most were slow and couldn't be used. Most free VPNs have hidden disadvantages, from annoying ads to privacy incidents and data breaches. For this reason, I always recommend using a premium low cost VPN like NordVPN. It's fast, versatile and secure, and you can test your Android with a 30-day money back guarantee. There are some free VPNs you can use without compromising your privacy. They are usually limited to free versions of premium services. After many tests, list of the best free VPNs for Android, based on their speed, security and performance. Quick Guide: The 10 best free VPNs for Android NordVPN: fast, secure and unlimited. With a 30-day money back guarantee, you can safely test it. Hotspot Shield: 500 MB of free daily data. Reliable, high-speed connections and premium security features. PrivateVPN : reliable, secure and able to avoid geoblocks. You can use it for free for a 7-day trial period. Windscribe: 10 GB of free monthly data. Easy to use Android apps with integrated ad and malware blocker. hide.me: 2 GB of free monthly data. High-speed connections and military-grade security. TunnelBear: 500 MB free monthly data. GhostBear mode prevents geo-restrictions, VPN locks, and censorship. ProtonVPN: unlimited data, speed and bandwidth. Easy and easy to use Android app. Opera VPN: Opera secure browser plugin with unlimited data. You don't even have to create an account. Speedify: 5GB free monthly data and channel aggregation feature to maximize connection speed. Betternet: intuitive Android app with 500MB free daily data. Supports P2P connections. Maintaining VPN networks is expensive. Free VPNs don't charge users, so they need to earn money in other ways. Some providers use annoying but relatively innocuous methods, such as ads. Others have directly dangerous methods. Premium VPNs offer apps for most platforms, but free services usually don't. Many free VPNs only offer apps for laptops and desktops. Most of the Android-compatible services I've tried have outdated apps that use a lot of RAM and have slowed down my mobile significantly. Security-free VPNs don't have the best data protection. Many services use outdated encryption protocols or do not encrypt data at all. This means that your personal data is exposed to cybercriminals. They have caught some free VPNs selling user data for profit and installing malware in their apps. Premium VPNs such as Hotspot Shield use military-grade encryption and maintain a strict zero-record policy. This means that no records of your personal data or online activity are stored. Restrictions The safest free VPNs are limited versions of premium services. They are designed to be used during the free trial period and motivate you to sign up for the paid version. This can be speed and data and bandwidth restrictions, or unlimited usage for a limited period of time. You may only have access to a few servers. This makes it difficult to browse, torrents and stream. A Free VPNs tend to be much larger and more restrictive. For entire servers, the connection is often lost and you may have to wait for the server location. And even if you go into the server when it is full, the connection will be painfully slow, making it almost impossible to stream, use torrents or anything else that uses a lot of data. Best free VPNs for Android (updated December 2020) Free VPNs can't provide the same speed and security as premium services. But there are some secure and limited free VPNs for Android. I tested all VPNs on my Galaxy S10+ and preferred providers who also offer a free trial or premium service refund guarantee. 1. NordVPN - 30 day refund guarantee without risk Lightning Speed. More than 5390 servers. Streaming-optimized servers that can access Netflix. World-class security features. 30-day money back guarantee. NordVPN is a premium service that you can safely test with a 30-day money back guarantee. Ideal if you only need one service on the go or if you want to try a premium VPN. It operates more than 5,390 servers in more than 60 countries, including streaming and P2P-optimized servers. You can access the most popular streaming services, including Netflix and Hulu. You can also access international apps in the Play Store. You can use up to six devices at a time and offer apps for all major platforms. NordVPN uses 256-bit encryption, disconnection, and DNS leak protection. It offers foggy servers and maintains a strict zero-record policy. CyberSec technology blocks suspicious websites, malware, and ads. Our detailed NordVPN analysis includes speed test results and user reviews. NordVPN can access: Netflix, HBO, Hulu, Showtime, BBC iPlayer, Amazon Prime Video and Sling TV. Allows you to download torrents: Yes, there are specific P2P servers available. NordVPN works on these devices: Windows, macOS, Android, iOS, Chrome, and Firefox. It is also compatible with router. Start NordVPN! 2. Hotspot Shield - 7-day free trial premium version 500 MB free daily data. High-speed servers. Military-grade encryption. Hotspot Shield offers 500 MB of free daily data. This is enough for browsing, checking emails or standard definition streaming for 30 minutes. You do not need to provide them with your card details during registration. Hotspot Shield uses 256-bit encryption and maintains a strict zero record policy. The free version is kept in ads and limits it to two server locations. In my tests, I've found that your connections are reliable, but slow, while watching a YouTube video. Signing up for the premium version gives you unlimited data and over 3,200 servers in over 70 countries. You can try the premium service yourself with a 7-day trial and a 45-day money back guarantee. In the Hotspot Shield analysis, our detailed research has turned to our detailed research. Hotspot Shield can access: The free version of Hotspot Shield can't access streaming sites. Allows you to download torrents: Yes, it supports P2P, although torrents can be limited by data restrictions. Hotspot Shield works on these devices: Windows, macOS, Android, iOS, Chrome, and Firefox. Get Hotspot Shield for free! 3. PrivateVPN - Six concurrent device connections free 7-day trial period. Unlimited data and bandwidth. Full access to more than 60 server sites. PrivateVPN is another premium service that you can use for free for a 7-day trial period. You don't need to enter your payment information, so you won't have to pay automatically when the trial period expires. It uses 256-bit encryption, disconnect functionality, and DNS/IPv6 anti-leak protection. PrivateVPN has a strict zero-record policy. PrivateVPN operates high-speed servers in more than 60 countries. There are streaming-optimized servers that can access Netflix and most major streaming services. You can connect up to six devices at a time with a single PrivateVPN account. It offers a 30-day refund guarantee with all subscriptions. See how PrivateVPN compares competition in this in-depth review. PrivateVPN can access: Netflix, Hulu, HBO, Hotstar, Amazon Prime Video and BBC iPlayer. Allows you to download torrents: Yes, all servers allow p2p activity. It has a list of P2P-optimized servers through the application. PrivateVPN works on these devices: Windows, macOS, Android, and iOS. Get PrivateVPN for free! 4. Windscribe - 10GB of free data every month with 10GB of free data every month. Ad and malware blocker. Split tunnel. Windscribe offers 10GB of free monthly data. That's enough to broadcast 20 minutes of TV a day. You can earn a 5 GB bonus per month by tweeting about the company. It uses military-grade encryption, a strict zero-registration policy, and integrated ad and malware blockers. The Android app is easy and easy to use. This does not affect the performance of the device. Windscribe supports P2P connections and split tunneling, but the free version doesn't have access to Netflix. It also has only 10 server locations. Subscription to the paid version gives you unlimited data and access to servers in 50 countries, including streaming-optimized servers. While windscribe, I realized that my speed were unstable. The free servers are sometimes saturated, which slows down the connection speed. Learn more about Windscribe in a detailed review. Windscribe have access to: Ability to access Netflix United States exclusively for paid subscribers. Allows you to download torrents: Yes, all servers allow p2p activity. Windscribe works on these devices: Android, macOS, iPhone, Windows, Linux, Chrome, Firefox, Opera. Also compatible with smart TVs, NAS devices and routers. Get Windscribe for free! 5. hide.me - Stealth mode to improve the security of military-grade security features. Supports P2P. High-speed connection. hide.me offers 2 GB of free monthly data. This isn't enough to stream, but it's perfect if you just want to access sites and browse safely. The app is simple and easy to use. It uses 256-bit encryption and automatic isolating functionality. hide.me also maintains a strict zero-record policy. Stealth mode lets you choose which apps can run if you're not connected to the VPN. This helps prevent unsafe applications from endangering security. When I hide.me a video game, I realized there was no way to access streaming sites like Netflix. The free account limits it to 5 of its 57 server locations. If you sign up for the paid version you can get unlimited data and access to all servers. You can safely test the premium version with a 30-day money back guarantee. In our review, you'll learn what other users are hide.me. hide.me access: Allows you to download torrents: Yes, it allows P2P activity. hide.me works on these devices: Android, Windows, macOS, iOS, Linux, Chrome, Firefox, Windows Phone, Amazon Fire OS. It is also compatible with router. Free Hide.me. 6th TunnelBear - Overcoming VPN locks GhostBear 500 MB free monthly data. Avoid VPN locks and deep packet checks. Fast and easy-to-use application. The free version of TunnelBear gives you 500 MB of free monthly data. This is enough to stream an episode of a TV series in normal resolution or download the game from the Play Store. It uses 256-bit encryption and has zero record policy. GhostBear mode can prevent VPN locks and perform deep packet checks. This makes it a useful choice if you live in a region with internet surveillance and censorship. I could access HBO GO during my tests, but not on Netflix or Hulu. If you subscribe to the paid version, you'll get unlimited data and five concurrent connections. There is no refund guarantee, so you'll need to use the free version to test it. Learn how TunnelBear does our tests in this review. TunnelBear can access: Allows you to download torrents: Yes, it allows P2P activity. Tunnel beedve on Android, Windows, macOS, iOS, Chrome, Firefox, and Opera. Get TunnelBear for free! 7. ProtonVPN - Servers in the USA and Japan Unlimited data. Servers in the United States, Japan and the Netherlands. Best-in-class encryption. ProtonVPN offers unlimited free data and bandwidth. It uses military-grade security features, including 256-bit encryption, automatic disconnection, and DNS leak protection. I could access Netflix USA, Spotify and Kodi. The free version provides access to servers in the United States, Japan and the Netherlands. During the test, I noticed slow speeds and limitations. If you subscribe to the paid version, you get unlimited speed and access to servers in more than 36 countries. You can test the premium version with a 30-day money back guarantee. If you submit an application within 30 days, ProtonVPN will refund the portion of the service you did not use. Learn more about ProtonVPN in our analysis. You can access the free version of ProtonVPN: YouTube, Spotify, Netflix and Kodi. Allows you to download torrents: No, there are no P2P-enabled servers available to users of the free version. ProtonVPN works on these devices: Android, Windows, macOS, iOS, and Linux. Get ProtonVPN for free! 8. Opera VPN - Free browser extension with unlimited unlimited free data. Servers in the United States, Asia and Europe. This VPN is a free extension that works only in opera's browser. It offers unlimited data, bandwidth and speed. There are no applications and it only protects the data sent and received in the browser. It does not encrypt data from applications or P2P connections. There are three server places to choose from: the United States, Europe and Asia. I couldn't access Netflix or any other streaming service with Opera VPN. The connection was slower than other VPNs on this list, but I could watch the YouTube video after I waited for it to load. In our analysis, you can learn more about Opera VPN. Allows you to download torrents: Opera works on these devices: Android, Windows, macOS, iOS and Linux. Get the Opera for free! 9. Speedify - Monthly data limit 5 GB 5 GB free monthly data. Supports P2P. Go to Netflix USA. Speedify's Android app is easy to install and use. It offers 5 GB of free monthly data. This is enough to stream high resolution for about 90 minutes. Use 128 GCM encryption. Weaker than 256-bit encryption, but safe enough for everyday use. Speedify does not record browsing activity, but it does store certain user data. This includes contact information, as well as hours and duration of the connection. You can use channel aggregation to increase the speed of your connection between wi-fi and on your mobile phone. I realized I was using twice as much data, and my relationship was still slow. I could access Netflix USA, Hulu and Spotify. Sign up for the paid version for faster connection speeds and unlimited data. There's a 30-day refund guarantee, so you can test it carelessly. Learn more about Speedify in our analysis. Speedify can access: Netflix, Hulu, Kodi, Spotify. Allows you to download torrents: Some servers support P2P traffic. Speedify works on android, windows, macOS, iOS. Get Speedify for free! 10. Betternet - Catapult Hydra protocol for anonymous browsing 500 MB free monthly data. Supports P2P. High-level security features. Betternet's free plan includes 500 MB of free daily data. This is enough to stream a 20-minute series in normal resolution, but not a movie. When you create an account, you won't be asked for payment information. It uses 256-bit encryption and catapult hydra protocol. It offers perfect pre-secrecy, but no automatic disconnect function. You can't access Netflix or any other streaming service, but all servers support P2P connections. If you subscribe to a donkey version, you will receive an unlimited amount of data. There is no 30-day refund guarantee, but with a 7-day trial period, you can try it completely free of charge. We compared Betternet to the best VPNs in our detailed review. Betternet can access: Streaming sites are not available. Allows you to download torrents: Betternet works on these devices: Android, Windows, macOS, iOS, Chrome. Get Betternet for free! FREQUENTLY ASKED QUESTIONS Will vpn android work on other devices? The best VPN for Android 3 has apps for most platforms. They also allow concurrent connections so you can connect all your devices at once. Below each VPN, I've included a compatibility guide so you can see which apps are being offered. Does VPN affect speed? This is normal to experience some speed degradation when connecting to a VPN because the data takes extra time to travel to the VPN server. The VPN also takes a few seconds to encrypt and decrypt the data. This speed loss should hardly be noticed with a premium VPN. Are VPNs legal? It is legal to use a VPN for nearly 95.9% of the world. The use of VPN is a legal gray area in countries such as Iraq, Iran, Belarus, Turkey and Oman. In China, it is legal to use a VPN, but most services are blocked and not connected. If you're a tourist in these countries, you don't have to worry. There have been no cases where a tourist gets into trouble for using a VPN. In short, find free, secure and fast VPNs for Android. A limited free VPN can be a good solution if you just need a VPN for a while However, it is always better to choose a premium service. Most premium VPNs offer a free trial and money back guarantee, which you can test for free. My colleague has published a guide to the best VPN trial times here. If you are looking for a VPN to use in the long term, I recommend NordVPN. Fast, safe and limitless. The best thing is that it offers a 30-day money back guarantee. Remember: save money on your VPN plan with our latest offers and coupons. Privacy warning! You are also exposed to the websites you visit! Use the information above to track you, send you ads, and track what you're doing online. You can use VPNs to hide this information from the websites you visit and always be protected. I recommend NordVPN - a VPN No. 1 350+ providers we have tested. It has military-grade encryption and privacy features that ensure your security - and currently offers a 68% discount. Visit nordvpn nordvpn
